

Adjudicare

The **benefits**-adjudication
software you control

The Integrated Software Solution

The Adjudicare software solution electronically adjudicates health and dental claims while allowing users to interface with other systems such as third party administrator (TPA) and insurance carrier claim platforms.

Adjudicare is an integrated solution for the processing and payment of health and dental claims. It can administer any combination of traditional plan designs, health care spending accounts (HCSA) and/or cost plus arrangements. The system will adjudicate a claim and generate one cheque with a detailed explanation of the source of the funds, thereby streamlining the process and enhancing the plan member experience.

Adjudicare demystifies the group benefit process, making it easier than ever for plan sponsors to truly understand their business. The Adjudicare solution simplifies the adjudication process, giving its users tighter controls on their block of business. Reporting measures are easy to read and even easier to use to help manage group blocks of business.

How does this benefit you?

- Enables its users to manage the profitability of their block of business and their clients.
- Accommodates any plan design.
- Increases margins on the business block as volumes increase on the AutoBen system.
- Offers a fully transparent “white label” solution enabling its users to better promote their own brand.
- Can be fully integrated into an established TPA system.
- A strong solution that provides data integrity, system stability and adheres to legislative guidelines.
- Has established provisions in place for disaster recovery.

Automate your adjudication process.
